Education

California State University, Fullerton – B.S. in Computer Science (GPA: 3.88/4.00) Aug 2024 – May 2028

Experience

Product Lab, OpenAI – Fullerton, CA Mar 2026 – Present

- Evaluated unreleased AI features in a **50**-student cohort, identifying edge cases, UI bugs, and failure modes
- Sourced workflow friction across **300+** students, translating qualitative user pain points into roadmap feedback

Embedded Tutor, CSUF – Fullerton, CA Jan 2026 – Present

- Provide technical mentorship to **30+** students via 1-on-1 code reviews to improve C++ proficiency and grades
- Partner with faculty to guide Introductory Programming labs and lead individual student tutoring sessions

Figma Campus Leader, Figma – Fullerton, CA Aug 2025 – Present

- Synthesize feedback from **5,000+** students into actionable insights for the global product roadmap
- Scaled the on-campus design community to **120+** participants by leading workshops and brand adoption events

Research Systems Assistant, Caltech – Pasadena, CA Jun 2025 – Aug 2025

- Migrated the Mineral Spectroscopy web server from Apache 2.2/Win 7 to 2.4/Win 11, refactoring legacy configuration files and conducting system validation to secure access for **10,000+** global users
- Recovered **80GB+** of critical research data and software from failing hardware via disk imaging and manual file-system reconstruction, ensuring **100%** data integrity for the division

Projects

AI Ethics Simulation Benchmark | *TypeScript, React, Python, SpacetimeDB, LoRA, vLLM, Runpod, Bitdeer, CRS*

- Built survival and finance AI benchmarks measuring compliance, performance, and explanation-action gaps
- Enabled async multi-agent execution and replay across **162** runs and **8** models under varied policy prompts
- Evaluated LoRA adapters on **70** finance cases, one passing **42** vs. **40** for its matched base without policy prompts

Policy Intelligence Assistant | *React, TypeScript, FastAPI, AWS (Bedrock, Lambda, DynamoDB, CDK), Strands SDK*

- Built a 6-agent RAG pipeline on AWS Bedrock to detect policy conflicts across CSUB's **167-page** handbook
- Deployed an AWS CDK stack to automate policy reviews, cutting **$10k** per cycle and **10** reviewer workloads

Smart Glasses Piano Coach | *TypeScript, Node.js, FastAPI, NumPy, Even Hub SDK, Basic Pitch, Gemini API*

- Engineered a smart-glasses piano coach displaying diagrams, animations, and text cues, validated by **430** checks
- Integrated Basic Pitch, custom alignment, and Gemini coaching to pinpoint pitch, timing, and duration errors

Version Control for AI | *React, TypeScript, FastAPI, MongoDB, D3.js, Ollama, Tailwind CSS, ASUS Ascent GX10*

- Built a DAG-based AI chat platform (branch, merge) cutting context re-transmission **20%** via node forking
- Orchestrated **4** LLMs across **19** Fetch.ai uAgents on Agentverse via Chat Protocol for DAG operations

GitHub Stats CLI Tool | *Python, GitHub API*

- Implemented PR/commit collectors and dispatch layer for **6** metrics across **59** repos in the acmcsufoss org
- Optimized cache staleness thresholds across **59** org repos, raising coverage to **53/59** and cutting API calls **15%**

Leadership and Extracurricular

Director, FullyHacks – Fullerton, CA Sep 2024 – Present

- Managed logistics and venue operations for **300+** attendees while overseeing an **$8,500** event budget
- Directed outreach to **500+** tech companies, increasing sponsorship funding by **180%** for the 2026 season

Technical Skills

Languages: C++, TypeScript, JavaScript, Python, SQL, HTML/CSS, x86 Assembly, R

Developer Tools: React, FastAPI, Supabase, MongoDB, AWS, Strands SDK, Claude Code, Codex, D3.js, Figma
